On the Wings of Recovery: Resilience & Action

27 JUNE-2 JULY | SAN JUAN, PR

The **American Ornithological Society (AOS)** and **BirdsCaribbean (BC)**, in partnership with local hosts **Para la Naturaleza** and **Sociedad Ornitológica Puertorriqueña, Inc.**, invite you to **Puerto Rico Day: Bird diversity and conservation in the “island of enchantment”** on June 28, 2022!

This symposium will feature exciting talks by leading researchers and conservationists from across the island and beyond on a wide range of conservation tools and technologies being employed to combat threats and conserve the island’s birds and natural heritage.

The avifauna in Puerto Rico is represented by 354 bird species, including 107 native residents (17 unique to Puerto Rico) and 229 migrants!

SESSION I

- Adrienne G. Tossas** – Avian diversity and conservation challenges of Puerto Rico
- Francisco J. Vilella** – Quantifying species-habitat relationships for avian conservation in Puerto Rico
- Tanya Martínez** – Perseverance and promise: The Puerto Rican Parrot Recovery Program
- Katsí R. Ramos-Alvarez** – Yellow-shouldered Blackbird project challenges
- Hana C. Weaver** – Recovery of the Puerto Rican Sharp-shinned Hawk
- Marconi Campos-Cerqueira** – Acoustic sampling and occupancy maps for bird species in Puerto Rico

SESSION II

- Ingrid M. Flores-Vallejo** – Puerto Rico's bird conservation educational campaigns
- Omar Monzón-Carmona** – Citizen science, privately protected areas, and technology
- Laura L. Fidalgo-De Souza** – Post-hurricane Maria avian population and habitat assessment
- Thomas H. White** – Minimizing potential Allee effects in Psittacine reintroductions
- Jaime A. Collazo** – Conservation design: Habitat restoration for avian conservation
- Joseph M. Wunderle, Jr** – Predicting avian responses to climate change disturbances
